PROFESSIONAL SUMMARY

Full-stack developer with two years of professional experience at SecureEdge Fintech and prior freelance experience. Builds and maintains business applications, responsive websites, and API integrations using Laravel, PHP, JavaScript, and MySQL. Experienced in CRM, HRMS, railway operations workflows, document handling, and application troubleshooting.

PROFESSIONAL EXPERIENCE

Software Developer / Integration Specialist | SecureEdge Fintech

2 years of professional experience | India

- Developed and maintained frontend and backend features for business applications, including CRM, HRMS, and workflow management systems.
- Built database-driven modules with Laravel, Eloquent ORM, MySQL, and SQL; implemented forms, validation, search, filtering, and AJAX interactions.
- Implemented REST API integrations, data mapping, request/response handling, validation, and integration error handling.
- Worked on document uploads, file handling, PDF generation, debugging, and functional, integration, and regression testing.
- Collaborated on requirements, maintenance, and feature improvements using Git and GitHub.

Freelance Full-Stack Developer | Prior to SecureEdge

- Worked directly with clients to understand requirements and deliver responsive websites and custom web applications.
- Built PHP/Laravel backends, authentication, CRUD functionality, APIs, and MySQL databases; supported testing, deployment, and maintenance.

TECHNICAL SKILLS & TOOLS

Core development: Laravel, PHP, JavaScript, jQuery, AJAX, MySQL, SQL, HTML5, CSS3, Bootstrap, REST APIs, Eloquent ORM

Frontend & interface toolkit: React, Next.js, TypeScript, Tailwind CSS, responsive design, Figma, UI prototyping

Workflow & mobile tools: Git, GitHub, VS Code, Postman, Android Studio, debugging, API testing, document management, PDF generation

SELECTED PROJECTS

SAMAY | Railway Operations Management Platform

A shared web platform for station masters, control rooms, and railway departments to coordinate daily operations.

- Supports role-based dashboards, block requests, temporary speed restrictions (TSR), caution orders, memos, acknowledgements, railway registers, notifications, uploads, and digital signatures.
- Developed and maintained operational modules and digital forms; worked on validation, PDF generation, document handling, bug fixes, and frontend workflow improvements.

Stack: Laravel, PHP, MySQL, JavaScript, jQuery, AJAX, Bootstrap

Shaurya Verma Portfolio | Web Development

- Built a responsive React portfolio with selected work, an about section, testimonials, and contact functionality; implemented spotlight, hover, and scroll-reveal interactions.

Stack: React, Vite, JavaScript, CSS | theshauryaverma.in

Roulette Game UI | Client Figma Design

- Designed a roulette game interface in Figma for a client, focusing on visual layout, presentation, and interaction clarity.

HRMS | Human Resource Management System

- Developed employee, attendance, leave, recruitment, payroll-related, and HR operations workflows with role-based access, dynamic forms, validation, and backend integration.

Stack: Laravel, PHP, MySQL, JavaScript, jQuery, AJAX, Bootstrap

CRM | Customer Relationship Management

- Developed database-driven lead, customer, follow-up, and sales workflows, including dynamic forms, search, filters, validation, AJAX interactions, and integration requirements.

Stack: Laravel, PHP, MySQL, JavaScript, jQuery, AJAX, Bootstrap

EDUCATION

Diploma in Computer Science & Engineering

Government Polytechnic | Uttar Pradesh, India
